

UNLV Author Search in Scopus

To begin, go to Scopus through this URL:

<http://ezproxy.library.unlv.edu/login?url=http://www.scopus.com>

Or, go to the UNLV Libraries home page at <https://www.library.unlv.edu/> and click on “All Library Databases.” From here click on “S” and then click on “Scopus.”

The screenshot shows the UNLV Libraries homepage. At the top left, it says "Welcome To University Libraries". Below this is a banner for "Digital Scholarship@UNLV" featuring a globe. On the right side, there is a "RESEARCH" menu with several options: "All Library Databases »", "Library Catalog »", "A-Z List of Journals »", "Course Reserves »", "Meet With a Librarian »", and "Tutorials »". A callout box with an arrow points to the "All Library Databases" link, containing the text "Click here to see a list of databases, including Scopus".

First, select the author tab, then search for your last name and Initials or first name. Then click on search.

The screenshot shows the Scopus search interface. At the top, there are tabs for "Documents", "Authors", "Affiliations", and "Advanced". The "Authors" tab is selected and highlighted with a red box. A callout box with an arrow points to this tab, containing the text "Select Authors search tab". Below the tabs, there are two search input fields. The first is labeled "Author last name" and contains the text "tucker". A callout box with an arrow points to this field, containing the text "Fill in author last name and author first name (first name can also be initials)". The second field is labeled "Author first name" and contains the text "cory". There is a "Search" button on the right side of the interface.

Results

In many cases, you will see multiple authors listed. This happens for several reasons

- Scopus uses an algorithm to decide which documents get attached to each author. Algorithm, in part, analyzes names, affiliations, email addresses
- When Scopus does not feel 100% certain of a match, they will create another profile

Go through your results and select the names that match you. Then click on “Show Documents.”

Author search results

Choose your default reference manager or file type: ?

Scopus offers integrated export functionality with Mendeley and Refworks. Or, to use a different reference manager, choose a file format

Save to Mendeley RIS Format EndNote, Reference Manager

RefWorks direct export CSV

BibTeX text ASCII in HTML

Choose the information to export: Choose the information you want to export to the reference manager or file.

Citation information only

Selected field includes: Citation information Author(s), document title, year, source title, volume, issue, pages citation count, source and document Type, DOI

Export

Once citations are checked, click export

Then select BibTeX
